

# IDENTITY SECURITY WORKSHOP

Find Identity Risks, Gain Insight into Your Application Landscape & Improve Your Identity Security Posture

## ARE YOU CONCERNED ABOUT SUSPICIOUS USERS AND SIGN-IN BEHAVIOR IN YOUR ENVIRONMENT?

If not, you should be. Microsoft uses machine learning to provide risk scores for 800 million accounts and finds that 300 million login attempts daily come from criminal actors and hackers. They detected 4.6 billion attacks in May of 2018 alone.<sup>1</sup>

Identity is today's gateway to your network and properly controlling it is the key to system security. The growing implementation of Cloud applications, the increased use of personal devices connecting to your network, and the rise of the remote workforce mean that

you are no longer able to protect your data behind a four-wall security fortress. The challenge now is securing user identities to ensure you are limiting access to authorized users.

<sup>1</sup>Eight essentials for hybrid identity #3: Securing your identity infrastructure, by Alex Simons, Microsoft blog post, October 19, 2018.

### Interlink Energize Identity Security Workshop

Interlink can help with a comprehensive workshop that will show you how to uncover identity risks in your environment, gain insights into your applications, and enhance your identity security posture.

### ATTENDING THIS WORKSHOP WILL PROVIDE YOU WITH:

- ✓ A rating of your identity security posture and how it compares to your peers
- ✓ A deeper understanding of ways to prevent identities from being compromised
- ✓ Insights into applications used in your environment including those not sanctioned by your IT department
- ✓ Ways to reduce costs and improve business agility and security with simplified apps access
- ✓ Methods to secure user identities on all devices

Gold Messaging  
Gold Communications  
Gold Windows and Devices

# Objectives of the workshop include:

## Optimize Identity

Identify potential risks related to identity and learn about opportunities for improvement

## Learn Cost Reduction Ideas

Learn to minimize expenses associated with password reset and help desk resources

## Assess Security Posture

Receive a numerical rating of your security posture and see how it compares to similar organizations

## Increase System Visibility

Receive a sample survey of apps your employees are using including those that are not supported by your IT group

## INTERLINK WILL WORK WITH YOU TO:

- ✓ Define your existing and desired identity posture
- ✓ Understand your identity goals and objectives
- ✓ Provide insights into all applications being used within your environment — both sanctioned and unsanctioned
- ✓ Showcase core IT and user security scenarios through in-depth demonstrations
- ✓ Develop a proposed action plan based on key results, recommendations, and next steps

## The Interlink Energize Identity Security Workshop Deliverables

The key to securing access to your network is to quickly and accurately identify authorized users and provide them with proper access to the apps and information they need to do their jobs. This workshop will provide you with the methods and tools to protect your authorized users' identities with authenticated credentials and file management while still allowing them the ability to collaborate with others.

Learn more about this valuable workshop, discuss your specific environment, and find out how you can get this engagement funded by Microsoft.
